FIRE WEATHER PLANNING FORECAST FOR WEST CENTRAL AND SOUTHWEST FLORIDA  
NATIONAL WEATHER SERVICE TAMPA BAY AREA RUSKIN FL  
730 AM EST TUE FEB 5 2002

...LOW HUMIDITY AGAIN THIS AFTERNOON BUT RELIEF IN SIGHT...

.DISCUSSION...NORTHEAST TO EAST WINDS WILL ALLOW MINIMUM HUMIDITY TO DROP TO AROUND 30 PERCENT BY MID-AFTERNOON. THE DRY INTERVAL SHOULD BE SHORT-LIVED AS A STORM SYSTEM DEVELOPS OVER THE NORTHERN GULF AND WESTERN FLORIDA PANHANDLE WEDNESDAY...DELIVERING WARMER TEMPERATURES BUT ALSO HIGHER HUMIDITY ON A MORE SOUTHEAST FLOW. WEAK SHOWER CHANCES WILL RETURN OVER THE NORTH NEAR A DEVELOPING WARM FRONT AS WELL AS OVER THE INTERIOR PORTIONS OF THE CENTRAL AND SOUTH WEDNESDAY THROUGH FRIDAY. THE WARM FRONT WILL MOVE NORTH OF THE REGION...ALLOWING DRY AND WARMER WEATHER TO RETURN FOR THE WEEKEND.
