

FFMPA Basin Shapefile Webinar Agenda
02/05/08

- I. Overview and background—why this process is necessary for OB8.3
 - a. FFMPA expanded domain
 - b. WarnGen inclusion of basin names
- II. The FFMPA Basin Repository website and how to use it:
 - a. NSSL needs IP address to grant access
 - b. Using the map display
 - c. Selecting the area of interest
 - d. Downloading shapefiles
- III. Discussion of basin processing options:
 - a. Use new basins only
 - b. Transfer names only from previously customized basins to new basins
 - c. Integrate more advanced customization (basin boundary edits, lake clipping, others) from previously customized basins to new basins
- IV. Overview of basin processing tools:
 - a. ArcView 9.2 version
 - b. ArcView 3.x version
 - c. Demo some of the basic processing tasks
 - d. Discuss the final steps before localization
- V. Wrap-up and any questions/concerns
