

## Flash Flood Monitoring and Prediction (FFMP)

### FFMP / AMBER Scatter Plot

This is a scatter plot that compares 6-hour precipitation accumulation between FFMP and AMBER for the same time period and same basin data set. The data was acquired by San Juan and provided to us by Brad Diehl (SJU). This data is very raw and is being presented just to give an idea about how the two compare. As you can see, they are very much in line with each other. The differences that do exist are most likely attributed to rounding differences.
