- Click on “**digital – Terminal Procedures**” near the middle of the next page. If more than one product appears, click on the one with the most current date

The screenshot shows the Federal Aviation Administration website. The main heading is "digital - Terminal Procedures Publication (d-TPP)/ Airport Diagrams". Below this, there is a table with three columns: "Product", "Effective", and "Ending". The table contains two rows of data. A red circle highlights the table, and a red arrow points to the first row.

Product	Effective	Ending
<a href="#">digital - Terminal Procedures (0810)</a>	25 September 2008	23 October 2008
<a href="#">digital - Terminal Procedures (0811)</a>	23 October 2008	20 November 2008

- On the map, click on the **state** where the airport is located. In this example, we will choose Massachusetts.

## Category A – Airport Landing Minimums

### Part 1: ILS Available for the Airport

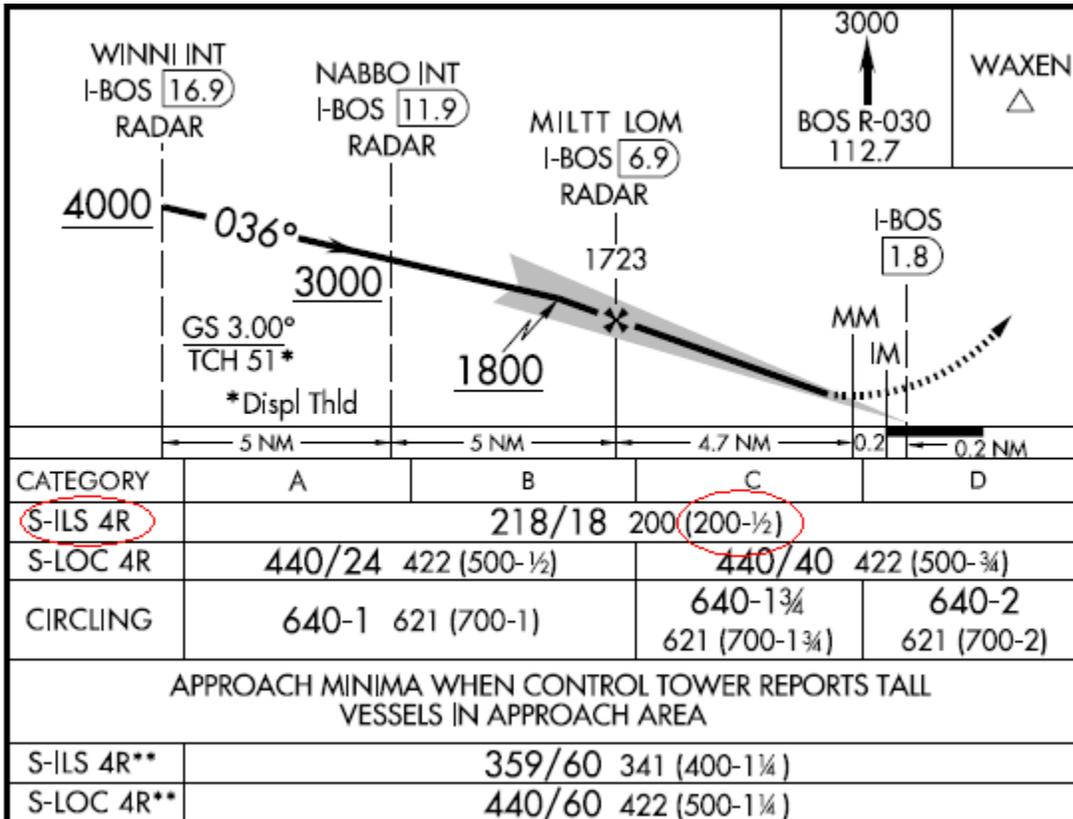

- Look for “ILS” in the Procedure column, and click on PDF. If more than one ILS is listed, choose the first one, since it will have the lowest minimums. If no ILS is available, follow the instructions in Part 2.

- The Category A minimums will be listed in the lower left portion of the airport diagram. In the "S-ILS" line, use the values in parenthesis. In this example, the minimums are 200' and 1/2SM, which are the values for most airports.

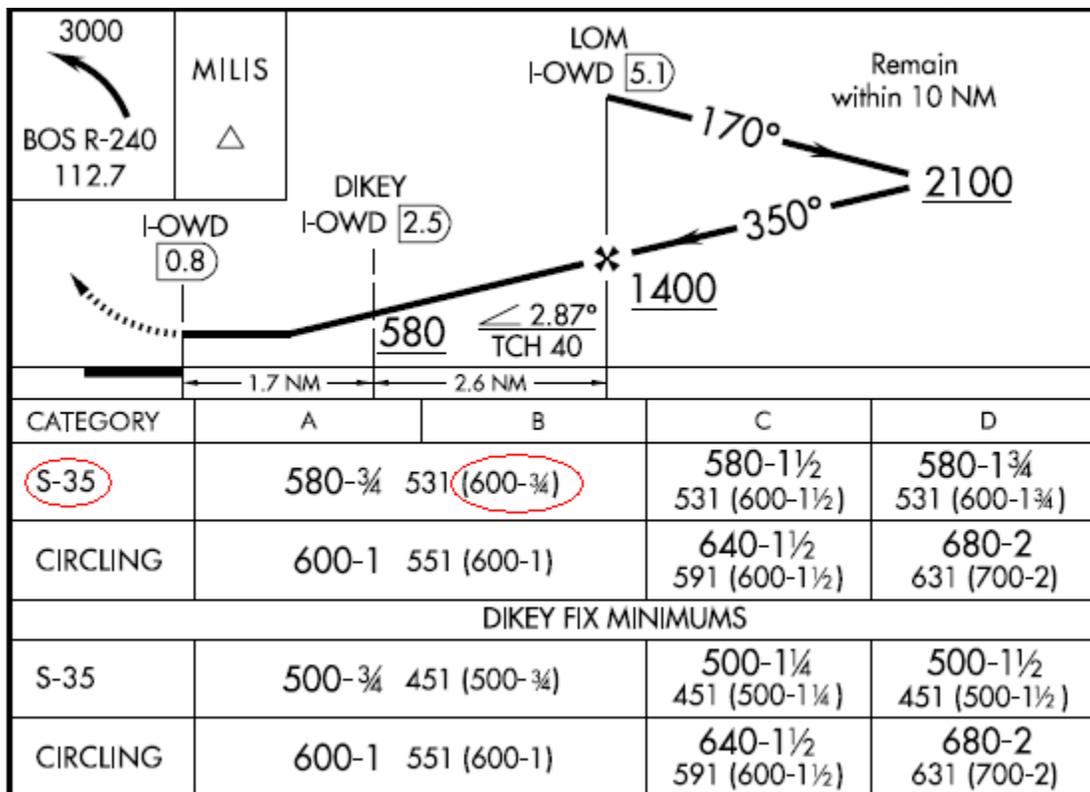

## Part 2: No ILS Available for the Airport

- For airports that are not served with ILS, use the following list in descending order:
  - LOC/DME (Localizer with Distance Measuring Equipment)
  - RNAV/GPS
  - LOC
  - VOR/DME (Very High Frequency Omni-Directional Range)
  - VOR
  - NDB (Non-Directional Beacon)
- In the example below, there is no ILS available at KOWD. Therefore, we would choose **LOC** to find the Category A minimums.

- Refer to the appropriate category in the lower left portion of the airport diagram. Use the values in parenthesis. In this case, the minimums would be 600' and 3/4SM.

**Category C – Instrument Flight Rule Conditions (IFR)**

- 1000' and 3SM for all airports

**Category D – Marginal Visual Flight Rule Conditions (MVFR)**

- 3000' and 5SM for all airports

**Category E – Alternate Fuel for Airport Under IFR Conditions (Alt)**

- 2000' and 3SM for all airports

**Category F – Other Conditions Defined by Local Air Traffic Managers or Airport Requirements**

- Local criteria. Consult with your CWSU for applicable Category F values at your TAF sites.
