DAB-HMM: New Functionality & Some Noticeable Bug Fixes

May 5, 2003

Task	Description
SCAN	0-3 Hour algorithmic output previously only available on the web is now available for display in the D-2D.
SCAN	The Storm Cell Table now has a toggle with which you can exclude the storm cells identified outside the CWA from alarm consideration and listing in the Cell Table.
SCAN	SCAN has a new "New Alarm" window which appears to the left of the screen (not over the main panel of the D-2D) and it does not take the cursor focus.
