

## **STATUS REPORT - MAY 2006 (includes thru June 6, 2006)**

### **Move to PostgreSQL, Build OB7.2**

With a great sigh of relief, at least on my part as team leader, I am very pleased to report that everything the RAXUM Team and HL were responsible for has been delivered to the contractor. This was an extremely difficult build because of all the changes that had to be made due to the upgrade of the OS and the change of the RDBMS from Informix to PostgreSQL. For the scripts and applications that were the responsibility of the RAXUM Team, I wish to thank all those that contributed to this effort, in particular, Brenda Alcorn, Steve Shumate, James Paul, Arleen Lunsford, Eric Jones, Victor Hom and John Lague.

The RAXUM Team hopes to complete the task of updating all of the user documentation over the next several weeks.

### **Transition of OHD Archive Scripts**

Joe Ostrowski, MARFC, is busy working on the monitoring script. Hopefully there will be something available in late June/early July.
