

VI.6.3-PPDUTIL-UNSDFREE PROGRAM PPDUTIL COMMAND UNSDFREE

Purpose

Command UNSDFREE marks the last free pool record in the Preprocessor Data Base in use for the specified RRS station and data type.

These records can become improperly marked not in use if a program terminates abnormally in a previous job while writing RRS data or if multiple jobs attempt to update the free pool at the same time.

Input Data

<u>Card</u>	<u>Field</u>	<u>Format</u>	<u>Contents</u>
1	1		'@UNSDFREE'
2	1	A8	Station identifier
	2	A4	Data type

Repeat card 2 to process additional stations and/or data types.

3	1		'END'
---	---	--	-------
