

2011 Tropical Cyclone Fatalities

After a year when hurricanes and tropical storms claimed no victims, sadly tropical storms resulted in 9 U.S. deaths in 2011, all the result of Hurricane Irene and Tropical Storm Lee, which both cut a wide swath across the East Coast, but most heavily impacted the Northeast. There were 20 named tropical storms in the Atlantic Basin in 2011, of which 7 had wind speeds that measured hurricane force, just 1 below 2010, which numbered 21 named storms, 11 of which became hurricanes. The Pacific Basin was again less active than the Atlantic with 13 named storms: 10 Hurricanes, 1 Tropical Storm, and 2 Tropical Depressions.
