

Do you know why the Kircher Restroom/  
Concession Stand building was built on this level?

It is because it sits in the 100 YEAR FLOODPLAIN! The last time the waters of the Red Cedar rose to this level was March 24, 1904. Since that time there have been seven other major floods, most recently in April 1975.

There will be another major flood in Lansing. ARE YOU PREPARED? To get more information on flood preparedness contact: [www.floodsmart.gov](http://www.floodsmart.gov)
