

**FISCHER-PORTER REBUILD (FPR-E)**  
**WFO OPERATIONAL IMPLEMENTATION CERTIFICATE**  
**WFO - \_\_\_\_\_.**

The WFO (SID) \_\_\_\_\_ hereby certifies the conversion of all Fischer-Porter Upgrade (FPU) rain gauges to the FPR-E configuration in accordance with the *FPU Removal Instructions for FPR-E Offices (2012)*, as of (Month/Day/Year) \_\_\_\_\_.

Documentation listed below was submitted to the Meteorologist In Charge to validate the successful implementation of all FPR-E in this Cooperative Program Area / County Warning Area.

Required Documents

Initials / Date

- A. **FPR Operational Implementation Checklist** completed by the NWSREP one per each FPU site converted to FPR-E in the County Warning Area / Cooperative Program Area. \_\_\_\_\_
- B. **FPR Thirty-Day Report** provided by NWSREP if necessary to document any FPR-E system outages and/or TXT data file handling problems, that could not be resolved during the 30-day evaluation period. Documentation of follow-on remedial actions taken to resolve the problems, and results achieved, should also be included. COOP Station Number: \_\_\_\_\_

Meteorologist in Charge (MIC)

MIC Signature

\_\_\_\_\_  
Date

**Instructions:** The NWSREP completes an **FPU Conversion Checklist** for each FPU site and notifies the MIC of each. In addition the NWSREP submits a **Thirty-Day Report** to document those problems at each COOP site where they could not be resolved locally in the 30-day evaluation period. **Note:** The evaluation period starts on the date the FPR-E was installed and activated. The NWSREP submits all **FPU Conversion Checklists** and **Thirty-Day Reports** to the MIC. When all checklists and reports have been reviewed to ensure remedial actions have corrected all documented problems, then the MIC signs and dates this Certificate. The NWSREP faxes just this **WFO Implementation Certificate** to the Observing Services Division (NWSHQ) on FAX 301-713-1598, and informs his/her RCPM.
