

Warning: Entries in the *Dictionary Manager* must be in lower case. Words entered into the *Dictionary Manager* of VIP that start with a capital letter are not being used properly. The translation entered will not be used. That is, if you entered “White” as a *word* and entered “blak” as a *Translation*, the VIP system *TTS clipboard* would still say “white”. NWR messages would also say “white”. **You must use all lower case.** The lower case entry will still handle any mixed case occurrence of the word in the TTS and message text.
