**Source Files:**

**Found by:** LeFebvre, Tom

**Date Found:** 05/07/09

**Software Version:** TO11D1

**Description:** For some tools that support drag events (e.g., Pencil Tool) when the event starts over a spatial editor legend the operation toggles the visibility of the element where the edit operation started.

**Test Case:** yes

**Test case info:**

- 1) Display a grid in the GFE
- 2) Select the Pencil tool.
- 3) Start the pencil tool operation over one of the legends of a weather element that is currently toggled off.
- 4) Note that the visibility of this element is now toggled on.
