

AWIPS Corrected Tickets for Delivery 6

Ticket Summary

- 772 The colorbar for combined images is black for one of the products
- 792 Implement Local Radar Mosaicing
- 795 Implement Radar Graphic Products
- 810 Points Tool - User is able to drag a labeled point (A-J) when the cursor is between .5 and 9 inches away from the labeled point in a random direction from the labeled point
- 954 The koax and Radar (dial radars) menus are missing a few items; implemented functionality
- 1025 After starting WarnGen, changing scales removes/deletes the point or warning area; disables WarnGen
- 1281 GRIBDecoder does not process some GRIB files.
- 1370 In the Publish to Official and Send Intersite Grids dialog, when selecting a group, not all Hazard or Public related weather elements are highlighted; Set Selected
- 1377 Hazards from the highlighted row(s) are not highlighted in the Text Display Area
- 1390 Operators involving '=' do not display appropriate edit area via the Edit Area and Query dialog (D1498)
- 1411 Publish to Official option should be grayed out when in Test or Practice Mode
- 1443 Menu options should have a check mark next to an active option
- 1498 DT: The colorbar has a -0 value; should be whole numbers
- 1890 Unable to successfully create a new Text Product in the Formatter Launcher and Define Text Products
- 1982 TO10 DT: Complete AvnFPS Functionality (D2840)
- 2054 Publish to official dialog is unreliable
- 2130 Selecting the Clear button with an X-Y tab visible, the tab remains open with a Map tab look
- 2233 TO8 TTR 200 Imaging dialog lacks checkbox for combine next image load
- 2240 TO 8 TTR 239. IFP Service Backup GUI Missing
- 2256 Implement Flash Flood Guidance HydroView Dialog
- 2258 Implement Best Estimate QPE HydroView Dialog
- 2259 Implement Flood Report HydroBase Dialog
- 2260 Implement Text Report HydroBase Dialog
- 2288 Port automated text formatter tests
- 2309 Starting terracotta as user "awips"
- 2339 ActiveMQ Problem on Clustered Servers
- 2366 Implement Remaining XNAV Functionality
- 2395 WarnGen default storm track
- 2398 WarnGen Storm Track issues.
- 2421 In HydroView No Data Displayed For Low Water Statement
- 2457 GFE: having problem in migrating getTdiff_Tool.py
- 2462 GFE: smartscript.cacheElements() failed.
- 2560 Port runProcedure

- 2603 Weather Element Browser should have a click toggle capability
- 2627 All Tilts paired radar products not paired correctly
- 2630 GFE: SmartScript.getLatLon() fails
- 2637 Hydro Perspective - Map Data / Clear Data functionality not implemented
- 2646 Text Editor WarnGen must modify text to store
- 2685 Implement Precipitation Polygon Editing
- 2693 D2D legends are not separately selectable nor cyclable
- 2694 Page Up/Dwn keys need to activate D2D looping.
- 2697 "No data available" should only display after data retrieval cycle is complete.
- 2707 EDEX not processing current-version raob messages (D839)
- 2759 WarnGen no fourth bullet option.
- 2765 HydroBase Station Search
- 2766 HydroBase, Deleted station is not removed from the list.
- 2767 HydroBase, New Station is not added to the list.
- 2769 Hydrobase, Copy to New Location feature
- 2772 Hydrobase Areal Definitions function is missing
- 2788 GFE Contour Tool issues
- 2799 Time Shift dialog should shift grids with the least common denominator of the time constraints
- 2803 Published grids do not contain any Grid History
- 2806 The selected colormap does not change the displayed colormap for Wx or Hazards grids
- 2823 AvnFPS TAF send dialog should send to transmission queue, not text workstation
- 2827 Clean up formatting of AvnFPS monitor balloon messages
- 2828 MTR label should turn yellow or orange in monitor GUI based on time
- 2834 The AvnFPS TAF Editor Restore From... just restores the last saved TAF
- 2835 Integrate legacy rltg in monitor GUI
- 2904 WarnGen Track anchor points do not behave correctly
- 2905 WarnGen vertices can be removed past the minimum number of 3
- 2906 WarnGen vertices can get crossed when moving box
- 2907 WarnGen counties can be moved with a warnGen box
- 2914 D2D: Lightning accumulation problems
- 2916 HydroView PDC - Elevation Filter
- 2920 'Page Up' and 'Page Down' keys don't scroll the text in the Text Workstation Editor
- 2921 The Text Workstation 'Show All' selection doesn't cascade the text windows.
- 2924 In the Text Workstation text editor an ambiguous 'CCCC' does not bring up an AFOS ID Selection GUI
- 2931 Formatter Launcher text does not display Test wording when CAVE is in Test mode
- 2932 AvnFPS TAF Editor Num Hours selection under the Metars tab not working properly.
- 2935 AvnFPS QC Menu doesn't allow single station changes (D2893)
- 2938 Graphic options (line width, magnification, etc.) are not available for Wx and Hazards grids
- 2939 Td and FzLevel grids cannot be displayed as a graphic
- 2943 Display Attributes error message incorrect
- 2944 Using Test: NoVTEC Formatting in Formatter Launcher fails to put in Test wording in text product
- 2946 HideTool within Python code fails to remove Smart Tool from the Edit Actions dialog
- 2947 Renaming a Smart Tool to a read-only entry (e.g., Smooth) fails to return an error, deletes Smart Tool
- 2948 The Edit Area Appearance dialog is not implemented

- 2950 LB.Y hazard is not a hazard available in the Make Hazard dialog
- 2957 Variable vs Height data displayed incorrectly
- 2959 ISC Discrepancies procedure needs to be ported (D)
- 2965 The Multiple request radio button should be selected as the default in the RMR New Request window
- 2970 Implement Obs-->Local Storm Reports
- 2994 WarnGen allows warning outside CWA
- 3048 Times (green times) not shown on Satellite menu although data are available
- 3049 Release ID not easily found.
- 3060 Minimum/Maximum values on radar products not updating correctly (D2643)
- 3061 Incorrect product codes for Terminal Doppler Weather Radar
- 3063 Empty color bar for Z/V product
- 3064 Volume Browser loads only analysis time of GFS models
- 3076 NWRWAVES AFOS test triggers does not trigger
- 3077 ECMWF display problems
- 3080 METAR stations not on map
- 3081 GFE: Temporal Editor only displays one element at a time
- 3082 Weather elements are not loaded in the temporal editor directly when in temporal editor mode.
- 3083 GFE: Publish To Official: Elements loaded in Grid Manager should be selected by default
- 3084 GFE: Formatter Launcher 'hide' not functioning correctly
- 3085 Change color option not available when Wx displayed as a graphic
- 3127 documentation - cli tools should be installed on edex systems
- 3137 Warning Products not available in Text Workstation
- 3139 Incorrect units on 1000mb RUC geopotential height
- 3142 Range Ring Dialog Box Repositions After the User Relocates the Dialog Box
- 3151 Errors loading winds from Volume Browser
- 3152 "H" grib files not stored
- 3153 AvnFPS Config: Can not delete products
- 3160 AVNFPS not storing TAF data under EDEX tree
- 3161 AVNFPS generates an unhandled event loop exception
- 3200 Running Cave as root makes it unstable for other non-root users
- 704 Main CAVE pane right click menu items.
- 1027 The non-Red Book items under the NCEP/Hydro menu are incomplete; implement functionality
- 1397 Set to Recent Values under the MB3 popup menu on the color bar fails for Wx grids when multiple weather types selected
- 1903 Colors/patterns wrong for WX grids in discrete colorbar
- 2249 Populate Satellite Derived Products Plot submenus with data
- 2472 CAVE: Time Matching Not Syncing with Warnings
- 2676 Derived satellite products have not been implemented
- 2720 Add New Baseline Smart Tools to AWIPS II
- 2721 Add New Baseline Procedures to AWIPS II
- 2862 GFE needs to create Practice and Test databases
- 2865 GFE should not allow multiple formatter launchers to be opened
- 3293 Implement archival infrastructure
- 3055 Polygon for Flash Flood warnings is not set where the 'Drag me to Storm' point is placed

- 3065 Occasionally moving vertices of a polygon created through WarnGen creates an error
- 3072 Develop CCFP rendering
- 3086 Implement Wind Chill/Heat Index in CAVE
- 3172 Separate grib ingest into separate camel instance
