

AWIPS II Topic of the Week -- DTP Briefing

All,

This week we had a very interesting, insightful meeting with our Raytheon partners. On Tuesday, February 24, Raytheon conducted the Deployment and Transition Planning (DTP) Briefing via WebEx and VTC. At the DTP meeting the majority of group discussion centered on the Site Migration preparation, as well as, Inter-site Coordination (ISC). In particular how sites can have AWIPSI and AWIPSII operate individually on the same hardware platform, and how it will aid with the local apps migration. A lot of engaging, thought provoking and lively discussions were expressed from the group in the meeting. It was very encouraging to see that everyone from the NLADT developers, regional sites, development organization (dev orgs) to Raytheon team clearly understand the critical/vital roles each plays in this major effort. Anyone who's touched by AWIPS has a vested interest for the success of the AWIPS SOA Migration endeavor. Many thanks to the Raytheon team for putting together an in-depth DTP Briefing. SEC encourages everyone to start viewing and working with the TO10 software. As always, we welcome your feedback and collaboration. To find out more about the DTP Briefing, please check the presentations page on the AWIPS Tech Infusion web site (<http://www.nws.noaa.gov/ost/SEC/AE/Presentations.htm>).
