

AWIPS II Topic of the Week -- Who's who with AWIPS II part deux

All,

It's amazing what a difference a year can make within the AWIPS world! A lot has changed within the AWIPS Program Management Office (AWIPS PMO). The Office of Science & Technology (OST) has been communicating in several forums regarding the AWIPS PMO personnel changes. Back in November 2009, Timothy Hopkins became the AWIPS Program Manager, and Eric Jordan came onboard as the AWIPS Deputy Program Manager for Operations & Maintenance. As stated before, even though the players have changed, our mission remains the same – to ensure successful AWIPS SOA migration/integration.

With that said, below are the primary points of contact (POCs) who are supporting the AWIPS II migration. If you have any questions regarding a particular topic area, please contact the respective individual. However, if you ever feel that you did not receive a suitable response to your questions, please contact Edward Mandel, AWIPS II Execution Project Lead and Systems Engineering Center (SEC) Development Branch Chief.
