

AWIPS II Topic of the Week -- Welcome

We heard you. We need to tell you more about what is happening with AWIPS II. What has been delivered? When can field sites see the software? What about local apps and config files and templates and procedures? In an effort to fill the information gap, we are instituting the /AWIPS II Topic of the Week/ -- a short email (one paragraph) about some AWIPS II topic of interest. So stay tuned, you will be seeing more info about AWIPS II every week. And in the meantime, check out the AWIPS Evolution web site at <http://www.nws.noaa.gov/ost/SEC/AE/index.htm>. We have posted training materials, local app migration roadmap, testing schedules and presentations about the software. I look forward to working with you to develop, test and then deploy this very exciting new AWIPS software.
