

AWIPS II Topic of the Week -- Master Deliverable Matrix (MDM)

All,

As part of the continuing AWIPS II testing effort, the Office of Science & Technology (OST) has developed the Master Deliverable Matrix (MDM). The MDM captures the myriad of existing AWIPS test cases and user scenarios from the various development organizations (dev orgs), as well as, field office sites. The MDM cross references known test cases to each Task Order (TO) 11 slice and identifies "test gaps", which are AWIPS functions which have no existing test cases or scenarios associated. Please note, the MDM is not a definitive requirements document, but rather it is considered as another analysis tool to aid in evaluating AWIPS II software. Many thanks to James Calkins, AWIPS II Independent Verification & Validation (IV&V) lead, and the IV&V team for the vital role they played in creating the MDM document. As always, we welcome your feedback and collaboration. To find out more about the MDM spreadsheet check the testing page on the AWIPS Tech Infusion web site (<http://www.nws.noaa.gov/ost/SEC/AE/Testing.htm>).

To join the mail list for these messages, please contact Fran Curnow at Frances.Curnow@noaa.gov.

Regards,

Olga Brown-Leigh
