

AWIPS II Topic of the Week -- AWIPS Task Order 11 (TO11) Slice 3.1 Delivery

All,

On Wednesday, July 1, Raytheon delivered the Task Order 11 Slice 3.1 (TO11 D3.1) Discrepancy Reports (DR) software update to the Office of Science & Technology (OST). TO11 D3.1 addresses fixes for 73 DRs covering approximately 26 Test Trouble Reports (TTRs). Of the 73 DRs 65 are rated "Major" fixes, 7 are rated "Minor" and 1 is rated "Trivial". The following lists the functional areas in the TO11 D3.1 software:

- 49 Graphical Forecast Editor (GFE) DRs
- 15 Display Two-Dimensions (D2D) DRs
- 4 Hydro Perspective (Hydro) DRs
- 4 Warning Generation (WarnGen) DRs
- 1 AWIPS Development Environment (ADE) Documentation DR

Initially, OST experienced some installation trouble with TO11 D3.1 release. However, we discovered it was a simple matter of a directory name mismatch which was fixed by removing an underscore. If only everything were that easy!

The slice-D3.1 software is being tested here at HQ and a few other locations, to verify the installation as well as basic functionality before broader distribution to the National Core Local Applications Development Team (NCLADT) and User Functional Evaluation (UFE) sites for testing. SEC encourages everyone to start viewing and working with the new software. As always, we welcome your feedback and collaboration. To find out more about the TO11 D3.1 DR Report check the testing page on the AWIPS Tech Infusion web site (<http://www.nws.noaa.gov/ost/SEC/AE/Testing.htm>).

To join the mail list for these messages, please contact Fran Curnow at Frances.Curnow@noaa.gov.

Regards,

Olga Brown-Leigh
