

AWIPS II Topic of the Week -- Collaboration is the Key: AWIPS NCLADT

All,

On Monday, September 14, the NWS Communications Office distributed the latest NWS Focus publication to all NWS employees. In this month's issue Ashley Kells, Site Migration Lead, and John Olsen, Core Local Apps Development Team (NCLADT) Lead, were featured as part of the AWIPS II article series. Both the Site migration and NCLADT team are charged with ensuring successful porting of field local applications from AWIPS to AWIPS Service Oriented Architecture (SOA) platform. As noted in the article, "A major chunk of the AWIPS II migration will happen at Regional Headquarters offices and field offices across the country..." via porting over twelve thousand local applications. The team is excited about the various migration activities and they look forward to the continued collaborations from the field. Listed below are proposed future AWIPS II articles that will showcase key principals through the end of the fiscal year. A very special thanks to Dr. Curtis Carey, NWS Communications Office Director, and his staff for the interviews and their outstanding job on providing insightful articles.

To read the NWS Focus article in its entirety please check the AWIPS Tech Infusion web site (<http://www.nws.noaa.gov/ost/SEC/AE/index.htm>).

AWIPS II Article Series

Sept/Oct 2009: Profile Raytheon AWIPS Team

Oct/Nov 2009: Profile AWIPS Operational Test &
Evaluation (OTE) Team
