- (NP) Karl Jungbluth
- (P) Brad Colman
- (P) Tom Salem
- (NP) Steve Keighton
- (P) Dan StJean
- (P) Jeff Medlin
- (P) Ken Falk
- (P) Bill Ward
- (P) Lee Anderson (facilitator)

Brief discussion occurred about recent results from the DS PAC meeting. This committee is considering which operational grids should be operational.

NWS ER will post fire weather graphics on local web for entire year. Fire weather grids will be produced for entire year. A short update on the AOR project occurred.

Some GMOS issues have occurred, however, these were solved. WR DS team will make decision to go forward with GMOS.

The team decided that they need to address short-term DFP issues. They talked about how they can formulate this task. For example, the team talked how should they look at the process, from organizational point of view? Where is the process now? Is the organization at an end state that is acceptable? One of our main themes considered was about the tools and the goals, and the role of verification. Brief discussion occurred about how to address uncertainty in this process. Each member will provide their version of an outline for the DFP document for the rest of the team, and how best to approach it.
