MEMORANDUM FOR: National Weather Service Directives System (NDS) Customers
/Signed/
FROM: John D. Murphy, NWS Chief Operating Officer
SUBJECT: Rescission of NDS 1-1001, *Tracking and Public Notification of Proposed Changes to NWS Information Services*

The following document is rescinded from the NDS.

NDS Title: Tracking and Public Notification of Proposed Changes to NWS Information Services
NDS Number: 1-1001
Effective Date: June 28, 2006
Signature Date: June 12, 2006
Certified By: Edward Johnson
Approving Authority: Edward Johnson

Summary: This procedural directive is being rescinded because other existing NWS capabilities are in place to support the required functionality. The vast majority of changes listed in the change database described in this directive are currently listed in the Analyze, Forecast, and Support Office (AFSO) product/service database at <https://products.weather.gov>. AFSO has agreed to accommodate the additional changes and COO is working with AFSO to enable the remaining items to be listed in this database. This will provide users with a single source of information on information service changes. The notification report described in this document is not required because all notification of comment periods and actual implementation of changes (post-decision) are provided via procedures in NWSPD 10-1805- *National Public Information Statements and Service Change Notices*.
