Opr: W/AFS13 (A. Horvitz)  
Type of Issuance: Routine  
Certified by: W/AFS21 (E. Jacks)

Summary of Revisions: This directive supersedes NWSI 10-504, “National Public Weather Forecast Products Specification”, dated December 5, 2012. This directive incorporates the following changes:

1. Deleted Preliminary Forecast Discussion product.
2. Updated Model Diagnostic Mission Connection, Section 2.1.
3. Updated Short Range Forecasts Valid Times, Section 3.2.4.
4. Changed issuance times for the Extended Forecast Discussion to 0700 UTC and 1600 UTC. Section 4.2.3. - Changed Mission Connection, Section 4.1 and Content, Section 4.3.3.
5. Updated Selected Cities Content to remove Elevation Criteria, Section 16.3.3.
6. Updated Issuance Times on Tables 7, Surface Prog and Table 8, Temperature / Precipitation Anomalies.
7. Changed all reference from the Hydrological Prediction Center to the Weather Prediction Center.

National Public Weather Forecast Products Specification

1 Introduction
This procedural instruction describes narrative, tabular and graphical weather products issued by multiple National Centers for Environmental Prediction (NCEP) offices. The Canadian Urban Forecast, issued by the Meteorological Service of Canada, and retransmitted by the National Weather Service (NWS), is included for domestic public interests.

2 Model Diagnostic Discussion (product category PMDHMD)

2.1 Mission Connection
NCEP’s Weather Prediction Center (WPC) issues the model diagnostic discussion, which provides an evaluation of the analyses of NCEP and non-NCEP model guidance, a review of model trends and biases and a description of model differences and preferences. These include the ensemble suites which are the operational model runs with different initialization conditions. The discussion focuses on the performance and impact on the weather forecast expected in the medium range time period, generally days 4 through 7.

This guidance is used by conterminous U.S. (CONUS) NWS field offices and the general meteorological community (private sector and the media), including the aviation community. The products support the NWS public and aviation weather programs.

2.2 Issuance Guidelines

2.2.1 Creation Software
WPC uses commercial text editor software.

2.2.2 Issuance Criteria
This is a routine, schedule-driven product.

2.2.3 Issuance Times
Preliminary issuance at 0445 and 1645 Coordinated Universal Time (UTC); final issuance at 0645 and 1845 UTC.

2.2.4 Valid Time
0000 UTC Day 1 to 1200 UTC Day 3 for 0645 UTC issuance; 1200 UTC Day 1 to 0000 UTC Day 3 for 1845 UTC issuance.
2.2.5 **Product Expiration Time**
Product expires with the next issuance.

2.3 **Technical Description**
The short range prognostic discussion should follow the format and content described in this section.

2.3.1 **Mass News Disseminator (MND) Broadcast Line**
Not applicable.

2.3.2 **MND Header**
The MND header is MODEL DIAGNOSTIC DISCUSSION.

2.3.3 **Content**
A narrative that may use standard NWS abbreviations to provide an evaluation of the North American Meso (NAM) and Global Forecast System (GFS) models, as well as a wide range of other Numerical Prediction Models for Day 1 to Day 3. Denotes quality of model initializations, model trends, and preferred models for various regions of the CONUS.

2.3.4 **Format**

MODEL DIAGNOSTIC DISCUSSION
NWS WEATHER PREDICTION CENTER COLLEGE PARK MD
152 PM EST TUE DEC 02 2014

VALID DEC 02/1200 UTC THRU DEC 06/0000 UTC

...SEE NOUS42 KWNO (ADMNFD) FOR THE STATUS OF THE UPPER AIR INGEST...

12Z MODEL EVALUATION WITH PREFERENCES
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
NAM/GFS INITIALIZATION ERRORS DO NOT SEEM TO DEGRADE THEIR SHORT RANGE FORECASTS.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
PREFERENCE: NON-GFS COMPROMISE
CONFIDENCE: AVERAGE

UPPER TROUGH/CYCLONE MOVING TOWARDS THE WEST COAST FRI
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

THERE REMAINS A BIT OF UNCERTAINTY WITH THE NEXT PACIFIC SYSTEM APPROACHING THE WEST COAST, WITH THE GFS ON THE SOUTH SIDE OF THE ENVELOPE OF MODEL SOLNS WHILE THE CANADIAN/UKMET/NAM/ECMWF MORE TO THE NORTH.

FOCUSED ON THE APEX OF THE RIDGE TO ITS NORTH...A CONSENSUS WHICH BEGAN ON THE 02/00Z RUN CONTINUED THIS MODEL CYCLE...MEANING THAT NON-GFS GUIDANCE FROM THE 02/12Z IS PREFERRED WITH AVERAGE CONFIDENCE.
WEAKENING SYSTEM MOVING NORTH ALONG THE WEST COAST WED/THU
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
PREFERENCE: GFS/ECMWF COMPROMISE
CONFIDENCE: AVERAGE

THE 02/12Z NCEP AND NON NCEP MODELS MADE FEW SIGNIFICANT CHANGES WHEN
COMPARED WITH THEIR 02/00Z RUNS. THE NAM REMAINED ON THE WEAK SIDE OF THE
ENVELOPE OF SOLUTIONS WITH THIS SYSTEM WHILE THE 02/12Z CANADIAN WAS ON THE
STRONG SIDE. OVERALL...THINK A COMPROMISE BETWEEN THE 02/12Z GFS AND 02/12Z
ECMWF.

SHORTWAVE MOVING THROUGH THE CENTRAL PLAINS THU NIGHT
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
PREFERENCE: CLOSEST TO THE ECMWF
CONFIDENCE: AVERAGE

THE 02/12Z GFS AND THE 02/12Z CANADIAN REMAINED ON THE SLOW SIDE OF THE MODEL
SOLNS WHILE THE UKMET WAS MORE DYNAMIC AND FASTER THAN OTHER MODELS. GIVEN
THE LOW-AMPLITUDE, QUASI-ZONAL FLOW...THE GFS/CANADIAN IDEA LOOKS LEAST
LIKELY TO PAN OUT. AT THIS POINT...WITHOUT ANY MAJOR SHIFT IN THE NCEP
MODELS...THE 02/12Z ECMWF WAS CLOSE TO THE 02/12Z ECMWF AND HAD THEIR 02/09Z
SREF MEAN SOLUTIONS SO IT REMAINED OUR PREFERRED SOLN WITH ABOUT AVERAGE
CONFIDENCE.

SHORTWAVE TROUGH/FRONTS MOVING THROUGH NEW ENGLAND WED/THU
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
PREFERENCE: NON-NAM COMPROMISE
CONFIDENCE: ABOVE AVERAGE

THE NON-NAM GUIDANCE FROM THE 02/12Z MODEL PRODUCTION CYCLE SHOWED GREATER
PROGRESSION WITH THIS SYSTEM, AIDED BY THE INCREASINGLY ZONAL FLOW PATTERN IN
WHICH THE SYSTEM BECOMES EMBEDDED. AS A RESULT...FEEL THE MORE NORTHERLY
SOLN IS MOST UNLIKELY TO VERIFY WHILE A COMPROMISE OF THE 02/12Z GFS AND
02/12Z NON-NCEP MODELS APPEAR TO HAVE THE BEST CHANCE OF VERIFYING WELL.

BANN

2.4 Updates, Amendments, and Corrections
No updates. WPC will correct for format and grammatical errors as required.

3 Short Range Forecast Discussion (product category PMDSPD)

3.1 Mission Connection
WPC issues a short range discussion that provides the meteorological reasoning behind the
Surface Fronts and Pressure Charts (section 13) and the Surface Instantaneous Precipitation
Charts (section 14) graphical products. This guidance is used by CONUS NWS field offices and
the general meteorological community (private sector and the media) including the aviation
community. The products support the NWS public and aviation weather programs.
3.2 Issuance Guidelines

3.2.1 Creation Software
WPC uses commercial text editor software.

3.2.2 Issuance Criteria
This is a routine, schedule-driven product.

3.2.3 Issuance Times
0900 and 2100 UTC.

3.2.4 Valid Time
1200 UTC Day 1 to 0000 UTC Day 3 for 0730 UTC issuance, and 0000 UTC Day 2 to 1200 UTC Day 3 for 1930 UTC issuance.

3.2.5 Product Expiration Time
Product expires with the next issuance.

3.3 Technical Description
The short range prognostic discussion should follow the format and content described in this section.

3.3.1 MND Broadcast Line
Not applicable.

3.3.2 MND Header
The MND header is SHORT RANGE FORECAST DISCUSSION.

3.3.3 Content
A narrative that may use standard NWS abbreviations that describes the meteorological reasoning for the location of significant weather features and precipitation across the CONUS for the next 12 to 48 hours.

3.3.4 Format

Short Range Forecast Discussion
NWS Weather Prediction Center College Park MD
248 AM EST Tue Dec 02 2014

Valid 12Z Tue Dec 02 2014 - 12Z Thu Dec 04 2014

...Wintry mix of precipitation possible across the Central Appalachians and into New England...

...Heavy rain possible over parts of California...

A quasi-stationary front extending from the Mid-Atlantic to along the Gulf Coast to the Rockies then westward across the Northern Rockies to the Pacific
Northwest will have a wave of low pressure over the Tennessee Valley that will move northeastward to Southern New England Coast by Wednesday morning. Rain will develop over parts of the Tennessee Valley and extend to the Mid-Atlantic on Tuesday morning with Pockets of rain/freezing rain over parts of the Mid-Atlantic/Central Appalachians that will expand northward into the Northeast by Tuesday evening. The rain will move off the Northeast/Mid-Atlantic Coast by Wednesday afternoon. Snow will also develop over parts of the Northeast through Wednesday evening. In addition, pockets of rain/freezing rain will develop near the rain/snow line over parts of the Northeast through to Wednesday.

Meanwhile, a weakening upper-level low off the California Coast will slowly weaken as associated upper-level energy moves inland over California. Moisture from the Pacific will move onshore over California that will produce light to moderate rain over parts of the state through Wednesday. Light rain and higher elevation snow will develop over parts of the Great Basin into the Central Rockies on Wednesday. Elsewhere, northerly flow off the Gulf of Mexico and a nearby front will aid in producing rain over parts of the Lower Rio Grande Valley on Tuesday. Additionally, easterly flow off the Atlantic will aid in producing rain along parts of the east Coast of Florida through Wednesday. Also, energy moving over the Great Lakes will produce scattered light snow over parts of the Upper Great Lakes.

Ziegenfelder

3.4 Updates, Amendments, and Corrections
This product is not updated or amended. WPC will correct for format and grammatical errors as required.

4 Extended Forecast Discussion (product category PMDEPD)

4.1 Mission Connection
WPC issues an extended range discussion that provides the meteorological reasoning behind the Days 3 to 7 Surface and 500 millibar (mb) forecasts (section 18). This guidance is used by CONUS field offices and the general meteorological community (private sector and the media) including the aviation community. Similar products are issued for Alaska. The products support the NWS public and aviation weather programs.

4.2 Issuance Guidelines
4.2.1 Creation Software
WPC uses commercial text editor software.

4.2.2 Issuance Criteria
This is a routine, schedule-driven product.

4.2.3 Issuance Time
Daily at 0700 UTC and 1600 UTC.

4.2.4 Valid Time
1200 UTC Day 3 to 1200 UTC Day 7.

4.2.5 Product Expiration Time
Product expires with next product issuance.

4.3 Technical Description
The Extended Forecast Discussion should follow the format and content described in this section.

4.3.1 MND Broadcast Line
Not applicable.

4.3.2 MND Header
The MND header is EXTENDED FORECAST DISCUSSION.

4.3.3 Content
This is a text product that describes the meteorological reasoning and uncertainty of the forecaster behind the generation of the Days 3 to 7 Surface Prognostications (Progs).

4.3.4 Format

EXTENDED FORECAST DISCUSSION
NWS WEATHER PREDICTION CENTER COLLEGE PARK MD
1056 AM EST TUE DEC 02 2014

VALID 12Z FRI DEC 05 2014 - 12Z TUE DEC 09 2014

...GUIDANCE/UNCERTAINTY ASSESSMENT AND SENSIBLE WEATHER HIGHLIGHTS...

THE LATEST MODELS AND ENSEMBLES OFFER A REASONABLY SIMILAR AND ACTIVE LARGER SCALE FLOW PATTERN EVOLUTION OVER MUCH OF THE NEXT WEEK...BOLSTERING FORECAST CONFIDENCE. HOWEVER...A MULTITUDE OF LESS PREDICTABLE AND VARIED AMPLITUDE SMALL-MID SCALE NRN AND SRN STREAM SHORTWAVES EMBEDDED WITH THE FLOW PROGRESS OVER NORTH AMERICA DOWNSTREAM OF AN ANCHORING NERN PACIFIC MID-UPPER LEVEL TROUGH. THE TIMING OF THESE FEATURES AND POTENTIAL ASPECTS OF ANY STREAM PHASING REMAIN MORE UNCERTAIN. ACCORDINGLY PREFER A PREDOMINANTLY ENSEMBLE MEAN BASED SOLUTION TO MITIGATE SOME OF THE SMALL TO MID SCALE UNCERTAINTY.

LEANED ON THE 00 UTC ECMWF ENSEMBLE MEAN INTO FRI/SAT THAT OF THE ENSEMBLE
SOLUTIONS SEEMS TO BEST MATCH WITH SEEMINGLY REASONABLE WPC OVERNIGHT MODEL DIAGNOSTIC DESK PMDHMD PREFERENCES...ESPECIALLY FROM THE ERN PACIFIC INTO THE WRN US THAT ALSO FAVORED SOME INFLUENCE FROM THE 00 UTC ECMWF/CANADIAN INTO THESE EARLY MEDIUM RANGE FRAMES IN CONTRAST TO THE MORE SOUTHWARD SHIFTED 00 UTC GFS.

INSTEAD MIXED THE 00 UTC ECMWF ENSEMBLE MEAN WITH SOME COMPATABLE 06 UTC GFS ENSEMBLE MEAN AT LONGER TIME FRAMES LATER WEEKEND INTO EARLY NEXT WEEK. THIS OFFERED BETTER CONTINUITY CONSISTENT WITH GROWING UNCERTAINTY. NRN AND SRN STREAM FLOWS OVER NORTH AMERICA SHOULD TEND TO AMPLIFY OVER TIME GIVEN THE SETTLED UPSTREAM NERN PACIFIC MID-UPPER LEVEL TROUGH POSITION. THIS PATTERN SHOULD PROVIDE SYSTEMS FOR A PROTRACTED WET PERIOD ACROSS THE NWRN US WITH SYSTEM APPROACH/PASSAGE AND AN EMERGING DOWNSTREAM WET PATTERN FROM THE E-CENTRAL TO ERN US. WHILE FLOW EVOLUTION DOES OFFER SOME POTENTIAL FOR SOME STREAM PHASING AND COASTAL LOWS FARTHER EAST...THE TIMING OF EMBEDDED SHORTWAVES IS TOO UNCERTAIN TO DETERMINISTICALLY DEPICT FEATURES WITH MUCH UMPh.

SCHICHTTEL

4.4 Updates, Amendments, and Corrections
This product is not updated or amended. WPC will correct for format and grammatical errors as required.

5 Caribbean Discussion (product category PMDCA)

5.1 Mission Connection
The WPC International Desks issue the Caribbean Discussion as guidance to Central American and Caribbean Basin users. It includes a 3-day forecast and model comparison.

5.2 Issuance Guidelines

5.2.1 Creation Software
WPC uses commercial text editor software.

5.2.2 Issuance Criteria
This is a routine, schedule-driven product.

5.2.3 Issuance Time
1830 UTC, non-holiday, Monday through Friday only.

5.2.4 Valid Time
0000 UTC Day 1 through 0000 UTC Day 3.

5.2.5 Product Expiration Time
Product expires with next product issuance.

5.3 Technical Description
The Caribbean Discussion should follow the format and content described in this section.
5.3.1 MND Broadcast Line
Not applicable.

5.3.2 MND Header
The MND header is TROPICAL DISCUSSION - INTERNATIONAL DESKS.

5.3.3 Content
This text bulletin gives a synopsis and forecast for Mexico, the Caribbean and South America north of the Equator for Days 1 to 3.

5.3.4 Format

TROPICAL DISCUSSION - INTERNATIONAL DESKS
NWS WEATHER PREDICTION CENTER COLLEGE PARK MD
209 PM EST TUE DEC 02 2014

DISCUSSION FROM DECEMBER 02/00UTC: BROAD MID/UPPER LEVEL RIDGE CONTINUES TO
DOMINATE FLOW ACROSS WESTERN PORTIONS OF THE DOMAIN. AT 250 HPA THE RIDGE IS
TO CENTER ON A CLOSED HIGH NEAR 15N 110W...WHILE AT 500 HPA THE HIGH CENTERS
FARTHER TO THE NORTH OVER THE COLIMA/NAYARIT IN SOUTHWEST MEXICO. THIS
SUSTAINS A SUBSIDENCE PATTERN ACROSS MEXICO THAT IS CAPPING DEEP CONVECTION.
AT LOW LEVELS...A RIDGE EXTENDS FROM THE WESTERN ATLANTIC TO THE NORTHERN
GULF OF MEXICO. THE LOW LEVEL RIDGE SUSTAINS A NORTHEASTERLY FLOW ACROSS THE
GULF INTO THE CENTRAL-SOUTHERN STATES. THIS IS ENHANCING MOISTURE
TRANSPORT/CONVERGENCE...WITH MOISTURE CONVERGING ACROSS SOUTHERN VERACRUZ-
CHIAPAS. IN THIS AREA EXPECTING RAINFALL AMOUNTS OF 00-05MM/DAY AND MAXIMA
OF 10MM THROUGH THURSDAY MORNING...AND TRACE AMOUNTS THEREAFTER.

A TROUGH LIES TO THE EAST OF THE UPPER LEVEL RIDGE...WITH AXIS SOUTH-
SOUTHWEST ACROSS THE EASTERN USA-THE YUCATAN TO THE EASTERN TROPICAL PACIFIC.
THROUGH THIS EVENING THE BASE OF THE TROUGH REACHES THE GALAPAGOS ISLANDS.
MID/UPPER LEVEL TROUGH THEN PUSHES EAST ACROSS THE BAHAMAS-CUBA...WHILE
TRAILING ACROSS THE WESTERN CARIBBEAN/CENTRAL AMERICA. AXIS IS TO THEN
SPLIT...WITH THE NORTHERN SEGMENT TO MEANDER EAST ACROSS HISPANIOLA TO PUERTO
RICO LATER ON THURSDAY/EARLY ON FRIDAY...WHILE THE SOUTHERN MOST EVOLVES INTO
A CLOSED LOW OVER CENTRAL AMERICA. AS IT CUTS OFF FROM THE FLOW...THIS
SEGMENT IS THEN FORECAST TO GRADUALLY WEAKEN/FILL. AT LOW LEVELS...THE
DEEPENING MID LEVEL TROUGH IS FORECAST TO FAVORABLY INTERACT WITH THE
PANAMANIAN LOW TO THE SOUTH. THROUGH WEDNESDAY MORNING THIS IS TO SUSTAIN
THE NORTHWARD AMPLIFICATION OF AN INDUCED/INVERTED TROUGH ACROSS PANAMA TO
THE CENTRAL CARIBBEAN. LATER ON THURSDAY THE PANAMANIAN LOW IS TO LIFT
ACROSS THE ISTHMUS TO THE SOUTHERN CARIBBEAN. AS THE TROUGH DEEPENS...STRONG
EASTERLY TRADES ACROSS THE BASIN ARE TO GRADUALLY WANE. THIS...IN-
TURN...WILL ALLOW FOR DEEP MOISTURE TO POOL ACROSS THE CENTRAL
CARIBBEAN...WITH PWAT IN THE AREA TO PEAK AT 50-55MM.

EARLY IN THE CYCLE THE DEEP MID/UPPER LEVEL TROUGH IS TO ENHANCE CONVECTIVE
DEVELOPMENT ACROSS NORTHERN HONDURAS/ISLAS DE LA BAHIA AND BELIZE...TO
SUSTAIN RAINFALL AMOUNTS OF 15-20MM/DAY AND MAXIMA OF 35-70MM. THROUGH
WEDNESDAY THIS DECREASES TO 10-15MM/DAY AND MAXIMA OF 20-35MM. OVER THE
NORTHWEST BAHAMAS-WESTERN CUBA THIS IS TO FAVOR RAINFALL AMOUNTS OF 00-
05MM/DAY AND MAXIMA OF 10MM THROUGH WEDNESDAY MORNING. LATER IN THE
DAY...MOST ACTIVE IS TO CLUSTER ACROSS THE SOUTHEAST BAHAMAS-TURKS AND
EASTERN CUBA...WITH RAINFALL AMOUNTS OF 05-10MM/DAY AND MAXIMA OF 15-20MM. THIS THEN SPREADS ACROSS NORTHERN HAITI/DOMINICAN REPUBLIC...WITH MAXIMA TO PEAK AT 15-20MM. AS THE PANAMANIAN LOW DEEPENS...THE MOST ACTIVE CONVECTION IS EXPECTED TO THE SOUTH...OVER SOUTHERN NICARAGUA/COSTA RICA. IN THIS AREA EXPECTING RAINFALL AMOUNTS OF 15-30MM/DAY AND MAXIMA OF 40-80MM...WITH THE MOST INTENSE ON TUESDAY TO WEDNESDAY. THIS DECREASES TO 15-20MM/DAY AND MAXIMA OF 25-50MM ON WEDNESDAY TO FRIDAY MORNING. ACROSS CENTRAL-EASTERN PANAMA EXPECTING RAINFALL AMOUNTS OF 05-10MM/DAY AND MAXIMA OF 15-20MM. THIS INCREASES TO 10-15MM/DAY AND MAXIMA OF 15-20MM LATER ON THURSDAY-FRIDAY MORNING. ON THE WESTERN PLAINS OF COLOMBIA AND THE ANDEAN REGION EXPECTING RAINFALL AMOUNTS OF 10-15MM/DAY AND MAXIMA OF 20-30MM. BUT AS THE PANAMANIAN LOW DEEPENS...THIS IS TO INCREASE TO 10-15MM/DAY AND MAXIMA OF 20-45MM LATER ON WEDNESDAY. LOCALLY HIGHER AMOUNTS ARE HIGHLY LIKELY DUE TO STRONG TOPOGRAPHICAL FORCING.

AMPLIFYING TROUGH TO THE WEST IS TO THEN INDUCE THE NORTHWARD AMPLIFICATION OF A MID/UPPER LEVEL RIDGE ACROSS THE VENEZUELA/EASTERN CARIBBEAN. BUILDING RIDGE IS TO THEN DISPLACE A TROUGH NORTH OF THE ISLANDS TO THE EAST OF 60W LATER THIS EVENING...AND ACROSS 50W LATER ON WEDNESDAY. STRONG SUBSIDENCE IS TO THEN ENVELOP THE EASTERN CARIBBEAN ISLES-NORTHERN VENEZUELA. OVER THE NORTHEAST CARIBBEAN ISLES THIS PATTERN IS TO HOLD THROUGH THURSDAY MORNING...WHILE OVER THE GUIANAS-WINDWARD/FRENCH ISLES THIS IS TO PERSIST THROUGH THE END OF THE WEEK. AS THE RIDGE BUILDS...EXPECTING NEGATIVE INTERACTION WITH THE ATLANTIC ITCZ. EARLY IN THE CYCLE THE CONVERGENCE ZONE IS TO MEANDER ACROSS TRINIDAD/TOBAGO TO NORTHEAST VENEZUELA. THIS IS TO MEANDER SOUTH TO THE NORTHERN THE GUIANAS AS THE CYCLE PROGRESSES. ACROSS TRINIDAD AND THE GRENADINES THIS IS TO FAVOR RAINFALL AMOUNTS OF 05-10MM/DAY AND MAXIMA OF 15-20MM THROUGH WEDNESDAY MORNING...DECREASING TO 00-05MM/DAY AND MAXIMA OF 10MM ON WEDNESDAY TO FRIDAY MORNING. SIMILAR AMOUNTS ARE EXPECTED ACROSS NORTHEAST VENEZUELA-NORTHERN GUYANA.

TROPICAL/EASTERLY WAVES INITIALIZED AT 12UTC
INITIAL 24 36 48 60 72 84 96 TYPE
NONE.

5.4 Updates, Amendments, and Corrections
This product is not updated or amended. WPC will correct for format and grammatical errors as required.

6 Hawaii Discussion (product category PMDHI)

6.1 Mission Connection
The Hawaii Discussion focuses on Days 1-7 model differences, and highlights the reasoning used by the WPC forecaster in terms of model preferences for particular weather situations. This product supports public and private sector having a particular focus on Hawaii.
6.2 Issuance Guidelines

6.2.1 Creation Software
WPC uses commercial text editor software.

6.2.2 Issuance Criteria
This is a routine, schedule-driven product.

6.2.3 Issuance Time
1200 UTC.

6.2.4 Valid Time
0000 UTC Day 1 to 0000 UTC Day 8.

6.2.5 Product Expiration Time
Product expires after the next product issuance.

6.3 Technical Description
The Hawaii Discussion should follow the format and content described in this section.

6.3.1 MND Broadcast Line
Not applicable.

6.3.2 MND Header
The MND header is HAWAII EXTENDED FORECAST DISCUSSION.

6.3.3 Content
This is a text product that describes the meteorological reasoning for the location of significant weather and precipitation features in the vicinity of the Hawaiian Islands for the 7 day period.

6.3.4 Format

Hawaii Extended Forecast Discussion
NWS Weather Prediction Center College Park MD
646 AM EST Tue Dec 02 2014

Valid 00Z Wed Dec 03 2014 - 00Z Wed Dec 10 2014

The global numerical guidance is indicating that a trough will reload throughout the next week well to the east of Hawai'i, keeping a dry, generally northeast flow across the state. Deep-layer tropical moisture should be shunted off well south and west of the islands. Very little precipitation is expected, with many areas seeing no rain whatsoever. Even the normally wet terrain of the Big Island may not net more than an inch or so.

Cisco
6.4 Updates, Amendments, and Corrections
No updates are issued for this product. WPC will correct for format and grammatical errors as required.

7 South America Synopsis (product category PMDSA)

7.1 Mission Connection
The WPC International Desks issue the South America Synopsis as guidance to regional users, the U.S. Department of Agriculture, and the Department of Defense.

7.2 Issuance Guidelines

7.2.1 Creation Software
WPC uses commercial text editor software.

7.2.2 Issuance Criteria
This is a routine, schedule-driven product.

7.2.3 Issuance Time
1400 UTC, non-holiday, Monday through Friday only.

7.2.4 Valid Time
0000 UTC Day 1.

7.2.5 Product Expiration Time
Product expires with next product issuance.

7.3 Technical Description
The South America Synopsis should follow the format and content described in this section.

7.3.1 MND Broadcast Line
Not applicable.
7.3.2 MND Header
The MND header is SOUTH AMERICA SYNOPTIC DISCUSSION -INTERNATIONAL DESKS.

7.3.3 Content
This text bulletin gives a synopsis for South America south of the Equator.

7.3.4 Format

SOUTH AMERICA SYNOPTIC DISCUSSION - INTERNATIONAL DESKS
NWS WEATHER PREDICTION CENTER COLLEGE PARK MD
842 AM EST TUE DEC 02 2014

GFS DATA AT FTPPRD.NCEP.NOAA.GOV/PUB/DATA/NCCF/COM/GFS/PROD/

SYNOPSIS (VALID FROM DECEMBER 02 AT 00UTC): AT 200 HPA...THE SUBTROPICAL HIGH
NOW CENTERS SOUTH OF ITS CLIMATOLOGICAL POSITION OVER MATO GROSSO DO SUL IN
BRASIL. THIS EXTENDS A RIDGE TO THE NORTHWEST ACROSS BOLIVIA AND TO THE
SOUTHEAST ACROSS PARA/ANTA CATARINA IN SOUTHERN BRASIL. A TROUGH TO THE
EAST DOMINATES NORTHEAST AND NORTHERN STATES OF BRASIL. MOST ACTIVE
CONVECTION IS BUILDING IN ASSOCIATION WITH THE RIDGE...CLUSTERING ACROSS
RONDONIA-MATO GROSSO/MATO GROSSO DO SUL...WITH OTHER CONVECTION ACROSS MINAS
GERAIS-ESPIRITO SANTO IN ASSOCIATION WITH THE UPPER TROUGH.

AT 250 HPA...THE JET ANALYSIS SHOWS THE SOUTHERN POLAR WITH ENTRANCE AT 59S
75W...THEN ALONG 55S 52W...51S 31W...53S 17W...AND 54S 05W. THE NORTHERN
POLAR HAS ITS ENTRANCE AT 40S 95W...THEN ALONG 48S 91W...A 148KT MAXIMUM AT
54S 80W...A 170KT MAXIMUM AT 54S 62W...49S 45W...46S 77W...47S 19W...AND 45S
07W. THE SUBTROPICAL JET HAS ITS ENTRANCE AT 26S 75W...THEN ALONG 29S
68W...37S 56W...41S 46W...A 143KT MAXIMUM AT 42S 34W...42S 18W...EXITING AT
37S 06W.

AT 500 HPA...THE MID LEVEL ANALYSIS SHOWS A PROGRESSIVE SHORT WAVE TROUGH ON
THE SOUTHERN STREAM MOVING ALONG 85W AND TO THE SOUTH OF 50S. ANOTHER IS
PULLING ACROSS THE DRAKE PASSAGE/ANTARCTIC PENINSULA. OTHER PERTURBATIONS
POPULATE THE NORTHERN STREAM FLOW...WITH ONE ALONG 95W TO 30S. THIS IS
PRESSING AGAINST A RIDGE TO THE EAST...AS THE LATTER EXTENDS FROM 28S 85W TO
NORTHERN PATAGONIA IN ARGENTINA. FARTHER EAST...A LOW NEAR 34S 66W ANCHORS A
SHORT WAVE TROUGH OVER CENTRAL ARGENTINA...WITH AXIS TRAILING TO THE
NORTHWEST ACROSS LA SERENA CHILE TO THE EASTERN PACIFIC.

AT LOW LEVELS...THE SURFACE ANALYSIS SHOWS A LONGLATITED FRONT ON THE SOUTHERN
STREAM THAT LIES ALONG A 978 HPA LOW AT 58S 53W...50S 58W...49S 70W...A 996
HPA LOW AT 53S 79W...49S 83W...A 1006 HPA LOW AT 43S 91W...AND 35S 94W. THIS
SUSTAINS LIGHT RAINFALL ACROSS EXTREME SOUTHERN PORTIONS OF CHILE. A RIDGE
to the north centers on a 1025 HPA HIGH AT 36S 83W. FARTHER EAST...AN
LONGLATITED FRONT ON THE NORTHERN STREAM LIES ALONG A 1006 HPA LOW AT 44S
31W...39S 37W...A 1016 HPA LOW AT 37S 45W...31S 48W...RIO GRANDE DO SUL...A
1010 HPA LOW OVER CORRIENTES ARGENTINA...EASTERN PARAGUAY-SOUTHEAST BOLIVIA
to northwest. THIS SUSTAINS SCATTERED DEEP CONVECTION. A RIDGE TO SOUTH
CENTERS ON 1017 HPA HIGH...WITH ONE AT 39S 56W AND THE OTHER AT 34S 63W.

ARREAGA...INAMHI (ECUADOR)

9.3 Technical Description
Charts should follow the format and content described in this section.

9.3.1 MND Broadcast Line
Not applicable.

9.3.2 MND Header
The MND header is CODED SURFACE FRONTAL POSITIONS.
9.3.3 Content
These are text bulletins that give the latitude and longitude positions (to the nearest degree) of vertices along the analyzed frontal positions or significant weather features along with the positions of high and low pressure centers.

Here is specific information on how to decode / interpret the bulletin:

44109 = 44°N Latitude, 109°W Longitude
HIGHS = High Pressure Centers
LOWS = Low Pressure Centers
COLD = Cold Front
WK = Weak
WARM = Warm Front
STNRY = Stationary Front
TROF = Weak Surface Boundary
OCFNT = Occluded Front

9.3.4 Format

Note: Valid time is decoded MMDDHH.

9.4 Updates, Amendments, and Corrections
This product is not updated or amended. Corrections are issued as necessary.

10 South America Forecast Discussion (product category PMDSA)

10.1 Mission Connection
WPC International Desks issue an overview discussion of numerical model guidance for South America to regional users.

10.2 Issuance Guidelines

10.2.1 Creation Software
WPC uses commercial text editor software.

10.2.2 Issuance Criteria
This is a routine, schedule-driven product.

10.2.3 Issuance Time
1630 UTC, non-holiday, Monday through Friday only.

10.2.4 Valid Time
0000 UTC Day 1 through 0000 UTC Day 5.

10.2.5 Product Expiration Time
Product expires with next product issuance.
10.3 Technical Description
The South America Forecast Discussion should follow the format and content described in this section.

10.3.1 MND Broadcast Line
Not applicable.

10.3.2 MND Header
The MND header is SOUTH AMERICA FORECAST DISCUSSION - INTERNATIONAL DESKS.

10.3.3 Content
This text bulletin provides an overview of the model forecasts and associated weather for South America for Days 1 through 5. The WPC International Desks prepare a set of graphics each day. Follow this link, [http://www.wpc.ncep.noaa.gov/international/intl2.shtml](http://www.wpc.ncep.noaa.gov/international/intl2.shtml), and look for the box labeled “Charts”.

10.3.4 Format

SOUTH AMERICA SYNOPTIC DISCUSSION - INTERNATIONAL DESKS
NWS WEATHER PREDICTION CENTER COLLEGE PARK MD
842 AM EST TUE DEC 02 2014

GFS DATA AT FTPPRD.NCEP.NOAA.GOV/PUB/DATA/NCCF/COM/GFS/PROD/.

SYNOPSIS (VALID FROM DECEMBER 02 AT 00UTC): AT 200 HPA...THE SUBTROPICAL HIGH NOW CENTERS SOUTH OF ITS CLIMATOLOGICAL POSITION OVER MATO GROSSO DO SUL IN BRASIL. THIS EXTENDS A RIDGE TO THE NORTHWEST ACROSS BOLIVIA AND TO THE SOUTHEAST ACROSS PARANA/SANTA CATARINA IN SOUTHERN BRASIL. A TROUGH TO THE EAST DOMINATES NORTHEAST AND NORTHERN STATES OF BRASIL. MOST ACTIVE CONVECTION IS BUILDING IN ASSOCIATION WITH THE RIDGE...CLUSTERING ACROSS RONDONIA-MATO GROSSO/MATO GROSSO DO SUL...WITH OTHER CONVECTION ACROSS MINAS GERAIS-ESPIRITO SANTO IN ASSOCIATION WITH THE UPPER TROUGH.

AT 250 HPA...THE JET ANALYSIS SHOWS THE SOUTHERN POLAR WITH Entrance AT 59S 75W...THEN ALONG 55S 52W...51S 31W...53S 17W...AND 54S 05W. THE NORTHERN POLAR HAS ITS ENTRANCE AT 40S 95W...THEN ALONG 48S 91W...A 148KT MAXIMUM AT 54S 80W...A 170KT MAXIMUM AT 54S 62W...49S 45W...46S 77W...47S 19W...AND 45S 07W. THE SUBTROPICAL JET HAS ITS ENTRANCE AT 26S 75W...THEN ALONG 29S 68W...37S 56W...41S 46W...A 143KT MAXIMUM AT 42S 34W...42S 18W...EXITING AT 37S 06W.

AT 500 HPA...THE MID LEVEL ANALYSIS SHOWS A PROGRESSIVE SHORT WAVE TROUGH ON THE SOUTHERN STREAM MOVING ALONG 85W AND TO THE SOUTH OF 50S. ANOTHER IS PULLING ACROSS THE DRAKE PASSAGE/ANTARCTIC PENINSULA. OTHER PERTURBATIONS POPULATE THE NORTHERN STREAM FLOW...WITH ONE ALONG 95W TO 30S. THIS IS PRESSING AGAINST A RIDGE TO THE EAST...AS THE LATTER EXTENDS FROM 28S 85W TO NORTHERN PATAGONIA IN ARGENTINA. FARTHER EAST...A LOW NEAR 34S 66W ANCHORS A SHORT WAVE TROUGH OVER CENTRAL ARGENTINA...WITH AXIS TRAILING TO THE NORTHWEST ACROSS LA SERENA CHILE TO THE EASTERN PACIFIC.

AT LOW LEVELS...THE SURFACE ANALYSIS SHOWS AN ELONGATED FRONT ON THE SOUTHERN STREAM THAT LIES ALONG A 978 HPA LOW AT 58S 53W...50S 58W...49S 70W...A 996
HPA LOW AT 53S 79W...49S 83W...A 1006 HPA LOW AT 43S 91W...AND 35S 94W. THIS SUSTAINS LIGHT RAINFALL ACROSS EXTREME SOUTHERN PORTIONS OF CHILE. A RIDGE TO THE NORTH CENTERS ON A 1025 HPA HIGH AT 36S 83W. FARTHER EAST...AN ELONGATED FRONT ON THE NORTHERN STREAM LIES ALONG A 1006 HPA LOW AT 44S 31W...39S 37W...A 1016 HPA LOW AT 37S 45W...31S 48W...RIO GRANDE DO SUL...A 1010 HPA LOW OVER CORRIENTES ARGENTINA...EASTERN PARAGUAY-SOUTHEAST BOLIVIA TO NORTHWEST. THIS SUSTAINS SCATTERED DEEP CONVECTION. A RIDGE TO SOUTH CENTERS ON 1017 HPA HIGHS...WITH ONE AT 39S 56W AND THE OTHER AT 34S 63W.

ARREAGA...INAMHI (ECUADOR)
DURAN...SENAMHI (PERU)
DAVISON...WPC (USA)

10.4 Updates, Amendments, and Corrections
No updates or amendments are issued for this product. WPC will correct for format and grammatical errors as required.

11 Today’s National Forecast Chart (no product ID or Header).

11.1 Mission Connection
WPC compiles three significant weather charts that highlight the critical weather expected over the next three days for the CONUS. These products support the NWS public weather program. A Spanish version is also issued for Day 1.

11.2 Issuance Guidelines

11.2.1 Creation Software
WPC uses N-AWIPS software to generate these products.

11.2.2 Issuance Criteria
These are routine, schedule-driven products.

11.2.3 Issuance Time
Issued twice daily. Initial issuance is no later than 1000 UTC and updated no later than 2200 UTC.

11.2.4 Valid Time
1200 UTC Day 1 to 1200 UTC Day 2; 1200 UTC Day 2 to 1200 UTC Day 3 and 1200 UTC Day 3 to 1200 UTC Day 4.

11.2.5 Product Expiration Time
Product expires with the next issuance.

11.3 Technical Description
Charts should follow the format and content in this section.

11.3.1 MND Broadcast Line
Not applicable.

11.3.2 MND Header
Not applicable.
11.3.3 Content
These are graphical products that depict the instantaneous positions of frontal features (warm, cold, occluded, trough lines, etc.) and high and low pressure centers at the valid time of the product. In addition, significant weather hazards such as flash flooding, severe thunderstorms, heavy snow, etc., are highlighted.

---

**Figure 3:** Symbols Used on Surface Analysis Charts

**Key to Features:**
1 – Cold Front; 2 – Warm Front; 3 – Stationary Front; 4 – Occluded Front; 5 – Trough (“TROF”) also used to depict Outflow Boundary (“OUTFLOW BNDRY”); 6 – Squall Line; 7 – Dry Line; 8 – Tropical Wave (“TRPCL WAVE”)
11.3.4 Format
Product will follow the format as indicated in Figure 4, below.

![Figure 4: Forecast Fronts / Pressure Centers and Significant Weather](image)

11.4 Updates, Amendments, and Corrections
Products are not updated or amended. Corrections are issued as necessary.

12 Surface Fronts and Pressure Charts (12-48 hours) (product categories 92F, 94F, 96F, 98F)

12.1 Mission Connection
WPC issues the surface fronts and pressure charts as guidance to CONUS NWS field offices and to the general meteorological community (private sector and the media), including the aviation community. These products describe the location and strength of major meteorological features over the next 48 hours. The products support the NWS public and aviation weather programs.

12.2 Issuance Guidelines

12.2.1 Creation Software
WPC uses N-AWIPS software to generate these products.

12.2.2 Issuance Criteria
These are routine, schedule-driven products.
12.2.3 Issuance Time and Valid Time
Refer to Table 4.

12.4 Updates, Amendments, and Corrections
Products are not updated or amended. Corrections are made as necessary.
13 Surface Instantaneous Precipitation Charts (12-48 hours) (product categories L2P, L4P, L6P, L8P)

13.1 Mission Connection
WPC issues the instantaneous precipitation forecast charts as guidance to NWS field offices and to the general meteorological community (private sector and the media) including the aviation community. These products describe the instantaneous location and coverage of precipitation and precipitation type every 12 hours through 48 hours. The products support the NWS public and aviation weather program.

13.2 Issuance Guidelines

13.2.1 Creation Software
WPC uses N-AWIPS software to generate these products.

13.2.2 Issuance Criteria

14 Coded Surface Frontal Positions Forecast (product category CODSRP)
14.1 Mission Connection
WPC issues the coded Surface Frontal Position Forecasts to NWS field offices and to the general meteorological community (private sector and the media). These products support the NWS public weather program.

14.2 Issuance Guidelines

14.2.1 Creation Software
WPC uses N-AWIPS software to generate these products.

14.2.2 Issuance Criteria
These are routine, schedule-driven products.

14.2.3 Issuance and Valid Time
Refer to Table 6.

14.2.4 Product Expiration Time
Not applicable.

14.3 Technical Description
Message should follow the format and content described in this section.

14.3.1 MND Broadcast Line
Not applicable.

14.3.2 MND Header
The MND header is CODED SURFACE FRONTAL POSITIONS FORECAST.

14.3.3 Content
These are text bulletins that describe the latitudes and longitudes (to the nearest degree) of vertices along the forecast frontal positions, along with the positions of highs and lows and pressures. These correspond directly with the 92F, 94F, 96F, 98F products described in Section 13. These text messages allow the private sector, academia, and the media to plot the location of these weather systems.
Here is specific information on how to decode / interpret the bulletin:

44109 = 44°N Latitude, 109°W Longitude

HIGH = High Pressure Centers
LOWS = Low Pressure Centers
COLD = Cold Front
WK = Weak
WARM = Warm Front
STNRY = Stationary Front
TROF = Weak Surface Boundary
OCFNT = Occluded Front

14.4 Updates, Amendments, and Corrections
Products are not updated or amended. Corrections are issued as necessary.

15 Ultraviolet Index (UVI) Forecast (product category UVICAC)

15.1 Mission Connection
The Climate Prediction Center (CPC) issues a UV Index (UVI) Forecast for 58 U.S. cities daily. CPC generates the UVI Forecast to help people understand the effects on their skin of their exposure to the sun's ultraviolet radiation. This product is used by the media and supports public weather programs.

15.2 Issuance Guidelines

15.2.1 Creation Software
CPC uses commercial text editor software.

15.2.2 Issuance Criteria
This is a routine, schedule-driven product.

15.2.3 Issuance Time
The UVI product is issued daily at approximately 1800 UTC.

15.2.4 Valid Time
The product is valid for solar noon (approximately 12 noon local standard time or 1PM local daylight time), Day 2.

15.2.5 Product Expiration Time
Product expires after valid time.

15.3 Technical Description
The UVI product should follow the format and content described below.

15.3.1 MND Broadcast Line
Not applicable.

15.3.2 MND Header
The UVI MND header is NOAA/EPA ULTRAVIOLET INDEX /UVI/ FORECAST.

15.3.3 Content
Both the text-based and web-based products specify the forecast UVI for solar noon, Day 2.

16 Selected Cities Forecast (product categories SCS [01-04])

16.1 Mission Connection
The NWS Telecommunications Operations Center (TOC) began issuing the Selected Cities Forecast (SCS) in January, 2009. The SCS provides the observed maximum and minimum temperatures, observed precipitation, and forecast weather and temperatures for selected cities in the U.S., Puerto Rico and the U.S. Virgin Islands. This product is heavily used by the print media and supports the public weather program.

16.2 Issuance Guidelines

16.2.1 Creation Software
The TOC uses commercial text editor software.

16.2.2 Issuance Criteria
This is a routine, schedule-driven product.

16.2.3 Issuance Time
0100 and 1300 UTC.

16.2.4 Valid Time
1200 UTC Day 1 to 1200 UTC Day 2.

Figure 9: Ultraviolet Index Map
16.2.5 **Product Expiration Time**
Product expires with the next issuance.

16.3 **Technical Description**
The Selected Cities Forecast should follow the format and content described in this section.

16.3.1 **MND Broadcast Line**
Not applicable.

16.3.2 **MND Header**
The SCS header is SELECTED CITIES WEATHER SUMMARY AND FORECASTS.

16.3.3 **Content**
This is a tabular text product consisting of the previous day’s maximum and minimum temperatures and observed liquid precipitation, along with forecast weather and temperatures for the next two days for selected cities in the U.S., Puerto Rico and the U.S. Virgin Islands. The abbreviated forecasts are derived from the National Digital Forecast Database (NDFD) grids issued by NWS Weather Forecast Offices (WFOs). The last part (SCS14, FPUS20 KWBN) has a final section that gives the highest and lowest temperatures observed in the CONUS. If a city is missing, it is noted as “MISG” in the weather category and “MM/MM” for the maximum and minimum temperature.

16.3.4 **Format**

**Example...Morning Issuance:**

FPUS20 KWBN 041250
SCS01
SELECTED CITIES WEATHER SUMMARY AND FORECASTS...PART 1 OF 4
NWS/NDFD TELECOMMUNICATION OPERATIONS CENTER SILVER SPRING MD
850 AM EDT FRI JUN 04 2010

TEMPERATURES INDICATE DAYTIME HIGH...NIGHTTIME LOW
B INDICATES TEMPERATURES BELOW ZERO
PRECIPITATION FOR 24 HOURS ENDING AT 8 AM EDT

16.4 Updates, Amendments, and Corrections
These products are not updated or amended. The TOC will correct for format and grammatical errors as required.

17 Canadian Urban Forecasts (product category CSCNMC)

17.1 Mission Connection
The product is generated by the Meteorological Service of Canada (MSC), and disseminated internationally to U.S. public interests.

17.2 Issuance Guidelines

17.2.1 Creation Software
The NWS Telecommunications Gateway receives this product and re-transmits it to domestic users.

17.2.2 Issuance Criteria
This is a routine, schedule-driven product.

17.2.3 Issuance Time
This product is issued daily at approximately 0730 UTC and 1930 UTC.

17.2.4 Valid Time
Through Day 2.
17.2.5 Product Expiration Time  
Product expires with the next issuance.

17.3 Technical Description  
The product follows the format and content described in this section.

17.3.1 MND Broadcast Line  
Not applicable.

17.3.2 MND Header  
The MND header for this product is CANADIAN URBAN FORECASTS.

17.3.3 Content  
This product contains tabular arrays of short forecasts and predicted high and low temperatures (in degrees Celsius) for numerous Canadian cities.

17.3.4 Format  

Example:

FPCN12 CWAO 040800

18 Days 3 - 7 Surface Progs (product categories 9JH-9NH)

18.1 Mission Connection
WPC issues the Days 3 through 7 Surface Progs as guidance to NWS field offices and to the general meteorological community (private sector and the media) including the aviation community. These products describe the location of surface fronts and pressures for the Days 3 through 7. The products support the NWS public and aviation weather programs.

18.2 Issuance Guidelines

18.2.1 Creation Software
WPC uses N-AWIPS software to generate these products.

18.2.2 Issuance Criteria
These are routine, schedule-driven products.

18.2.3 Issuance and Valid Time
Refer to Table 7.
