1 Introduction
This manual provides World Wide Web (WWW) links to public zone maps, public zone listings, County Warning and Forecast Area (CWFA) maps, and CWFA listings. Individual state, territorial, and commonwealth public zone maps are presented. Links to geographic areas of responsibility for other NWS service program areas (i.e., Fire Weather, Hydrologic, and Marine services) are also included.

1.1 Public Zones
Public zone listings are arranged alphabetically within each of the six National Weather Service (NWS) Regions (Alaska, Central, Eastern, Pacific, Southern, and Western) and provide zone-related information including: associated state, zone code, zone name, county name/area designation, Federal Information Processing System (FIPS) code, Weather Forecast Office (WFO) name, and WFO ID.

1.2 County Warning and Forecast Areas
CWFA maps are arranged alphabetically by WFO ID within each of the NWS regions. CWFA listings are arranged alphabetically by WFO, state, and county name within each of the NWS regions. The listings consist of WFO name and office ID, county/parish/independent city name and corresponding state, FIPS code, portion of county in CWFA, square mileage of counties and county parts, and population of the entire county.
2 Public Zone and County Warning and Forecast Area Definition/Designation

2.1 Public Zones

Generally, a zone shape is influenced by topography, political boundaries, climate, population, land use, transportation routes, frequency of hazardous weather, etc.

2.2 County Warning and Forecast Areas

CWFA's are designated by counties/parishes (or parts thereof), and independent cities surrounding a WFO, without regard to state boundaries.

3 NWS National Scale Maps

3.1 National Weather Service Regions Map

3.2 U.S. Geographic Boundaries Reference Map

4 NWS State Scale Maps.

4.1 Public Zone Forecast Maps by State

4.2 County Warning and Forecast Area (CWFA) Maps by State

4.3 Federal Information Processing Standards (FIPS) Code Maps by State

5 NWS Local and Regional Scale Maps.

6 Geographic Areas of Responsibility for Other Programs.

Information on geographic areas of responsibility for other National Weather Service programs can be found at the following web site or in the following directives:

- a. Fire Weather Services: Zone Maps by State
- b. Hydrologic Services: NWSI 10-903, Geographic Areas of Responsibility;
