

Targeted Timeline for NAM MOS Deliverables

- ◆ *Probable NCEP moratorium on changes, as next CCS (Central Computing System) comes online, implementation dates subject to change. NCEP and MDL agree (through the OSIP process) obsolete model runs will not be supported on the new CCS ending the special run of the Eta32 for Eta MOS support. Propose all NAM MOS guidance will be redeveloped and produced from current NAM output by 2010, sooner if resources and sample sizes allow.
- ◆ Most equations are valid from April – September (warm season), and October – March (cool season). When possible, new equations are implemented to coincide with a change in the season, and not mid-season.
