V.3.3 DESCRIPTION OF FORECAST COMPONENT OPERATIONS

This Section contains documentation for each of the available Operations.

The Operations are identified by the identifiers given in Section V.3.2 [Hyperlink].

The documentation for each Operation includes the following:

- the programs in which the Operation can be used
- a description of the Operation
- information about the time series that can be used to supply input data and store output results
- a summary of the card input needed for each Operation when defining the Operations Table
- sample input, output and error messages
