Purpose

Function CPUCHECK prints the elapsed and total CPU time used.

HCL Input

Input to Function CPUCHECK is through the Hydrologic Command Language (HCL).

The input consists of Techniques and their Arguments (see Section VI.5.3C-SYSTEM-CPUCHECK-TECH).

Sample HCL Input

The following HCL input resets the elapsed and total CPU time used:

```hcl
@SETOPTIONS
  RESETCPU(1)
@COMPUTE CPUCHECK
@SETOPTIONS
  RESETCPU(0)
```
