IX.3.0B-SYSTEM-HINCNX  SUBROUTINE HINCNX

Description

Subroutine HINCNX increments the pointer to the Hydrologic Command Language [Hyperlink] option record for subroutine HMCHID [Hyperlink] and the other related routines.

If the pointer is greater than LRECOP(16) then it reads a new record and resets the pointer to 1. All pointers are in common block HSEG1 [Hyperlink].

Calling Sequence

CALL HINCNX

Argument List

None
